

U.S.S.N. 09/378,261
Filed: August 20, 1999
AMENDMENT

APPENDIX: Clean Copy of Claims as Amended

16. (amended) A method for enhancing an inflammatory response involving blocking of protein C or activated protein C binding to an endothelial cell protein C/activated protein C receptor comprising administering to a patient in need of treatment thereof an amount of a compound blocking binding of protein C or activated protein C to the receptor by binding to the endothelial cell protein C/activated protein C receptor.

17. (amended) The method of claim 16 wherein the compound is selected from the group consisting of antibodies and fragments of antibodies to the receptor, nucleic acid sequences encoding proteins or peptides inhibiting expression of the receptor, and synthetic or natural compounds other than proteins, peptides or nucleic acid sequences which inhibit binding.

24. (amended) A method for enhancing an inflammatory response involving blocking of protein C or activated protein C binding to an endothelial cell protein C/activated protein C receptor comprising administering to a patient in need of treatment thereof an amount of a compound blocking binding of protein C or activated protein C to the receptor by binding to the endothelial cell protein C/activated protein C receptor, wherein the compound is an antibody or antibody fragment immunoreactive with the receptor.

25. The method of claim 24 wherein the antibody is humanized.
26. The method of claim 16 wherein the compound is labeled.
27. The method of claim 16 wherein the compound is an oligonucleotide.
28. The method of claim 16 wherein the compound is a receptor fragment.

AMENDMENT

29. The method of claim 16 wherein the compound is combined with a pharmaceutically acceptable carrier.
30. The method of claim 16 wherein the compound is administered in an amount effective to enhance an inflammatory response involving blocking of protein C or activated protein C binding to an endothelial cell protein C/activated protein C receptor.
